WHO WE ARE

COMPANY INTRODUCTION

Ess Ess Steel Casting & Rolling Mills (P) Ltd. was established in 1993 under the dedicated efforts and visionary guidance of Sh. Dinesh Goyal Ji. The company specializes in the manufacturing and supply of hot-rolled steel products, including steel bars and a wide range of high-quality castings. Over the years, the company has built a strong reputation and goodwill for delivering exceptional quality, reliability, and timely delivery of its Steel Bar Products and Alloy Steel Ingots.

Why Choose Us

At Ess Ess Steel Casting & Rolling Mills (P) Ltd., we specialize in manufacturing a wide range of superior steel products, including Hot Rolled Round Bars, Round-Cornered Square Bars, Hex Bars, and various types of Castings. Our unwavering commitment to quality ensures dependable solutions tailored to meet all your industrial needs.

DEALS IN ROLLED BARS & CASTINGS

Rolling Mill

- ▶ Non Alloy Steel and Alloy Steel Round Bar
- ▶ Non Alloy and Alloy Steel Hex Bar
- ▶ Non Alloy and Alloy Steel Round Corned Square Bar

Casting

- ▶ Agriculture Casting Parts
- ▶ Auto Casting Parts
- ▶ Rotavator Casting Parts

**Ess Ess Steel One Of The Best
Casting & Rolling Mills Industry In India**

Quality Policy

We are committed to manufacturing and supplying high-quality products that meet customer requirements and ensure their satisfaction. Our focus is on continuous improvement of our manufacturing facilities while prioritizing employee safety.

R&D & Safety Facts

Our dedicated R&D team continuously works to enhance the designs of rolling mill steel products and castings. With our advanced hot rolling mill plant, we specialize in manufacturing a variety of steel rounds and customized designs to meet specific customer requirements.

In the field of castings, we excel in producing a diverse range of high-quality, precision-engineered castings tailored to meet the demands of various industries. From intricate designs to robust and durable cast components, our state-of-the-art casting facilities ensure superior product quality and performance. Our team leverages advanced techniques and materials to deliver castings that stand out in terms of strength, accuracy, and reliability, catering to industries such as automotive, construction, and machinery. We are dedicated to innovation and customization, offering solutions that align perfectly with our clients' specific needs.

Product in Rolling Mill

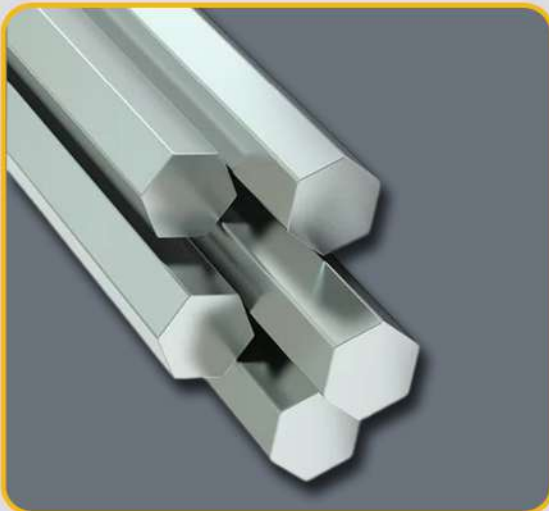

We produce economical and class-leading steel products with fully integrated steel manufacturing facilities.

Non Alloy Steel and Alloy Steel Round Bar

Steel Rounds are the basic raw material used in a variety of engineering, auto, and other ancillary industries. Ess Ess Steel Casting & Rolling Mills boasts of the best reduction ratios in the industry, ensuring our products offer optimal forgeability and machinability for our customers. We provide the widest range of Mild Steel, Carbon Steel, Alloy Steel, Free Cutting Steel, and all Special Grades.

Product Size	16 mm - 85mm

Product in Casting

We produce economical and class-leading steel products with fully integrated steel manufacturing facilities.

Agriculture Casting Parts

Our agriculture casting parts are engineered to meet the demanding needs of modern farming equipment. Crafted from high-quality S.G.I and C.I. material, these parts offer exceptional durability and resistance to wear, ensuring long-lasting performance in the toughest conditions. From plows to harvesters, our castings enhance the efficiency and reliability of agricultural machinery.

Auto Casting Parts

We manufacture precision-engineered auto casting parts that are designed to meet the stringent standards of the automotive industry. Using S.G.I and C.I. casting, we ensure superior strength and performance, ideal for a wide range of automotive components. Our castings are known for their reliability, making them a preferred choice for high-performance vehicles.

Rotavator Casting Parts

Our rotavator casting parts are built to withstand the rigorous demands of soil preparation and tilling. Made from robust S.G.I and C.I. materials, these parts ensure smooth operation and enhanced durability, helping rotavators deliver consistent performance over time. They are designed to fit seamlessly into various rotavator models, providing reliable and efficient service.
